

LABORATORY DESCRIPTION

General Information

School	Geotechnical Sciences
Department	Forest and Natural Environment Sciences

Title of the Laboratory - Acronym

Forest Botany and Geobotany

Head of the Laboratory

Tsiftsis Spyros

Short Description

The laboratory includes an office, a teaching room and a herbarium.

All internal lab activities are carried out in these spaces, that is teaching, research training, and Research in all sections of botanical science.

Lab areas are used by undergraduate and postgraduate students and lab collaborators.

Our research activities and interests cover a plethora of subjects in the fields of systematic botany and geobotany. More specifically:

- Systematics of Spermatophytes.
- Conservation Biology.
- Effects of Climate Change in Plant Biodiversity.
- Patterns of Plant Distribution.
- Flora and Vegetation of Greece.
